

# projectSTORE PRO

## Cross-platform Workspace, User and Media Management

### Easy and integrated user, workspace, and media management for ALL your creative applications

### A Complete Workflow System

Tiger Series solutions with projectStore PRO are the backbone of an advanced Shared Storage Workflow system. projectStore PRO eases your work thanks to multi-user project collaboration and management. Integrate with Avid and all your other creative tools, control user access and permissions, and manage storage usage with Backup & Archive capability (optional Replication & Tiering module). projectStore PRO transforms Tiger Series solutions into complete and intelligent workflow systems that make content-creation work easy, and boost your productivity and ROI.

### Everything you need

projectStore PRO gives you a complete set of easy to use workflow tools including:

- Easy, artist-friendly web UI
- Support for all your creative apps
- Mac, Linux, and Windows
- Workspace creation and management
- User creation and management
- Avid file system emulation with bin locking
- Check-in/check-out control
- Remote proxy viewing
- Instant search
- Template creation
- Easy floating licensing

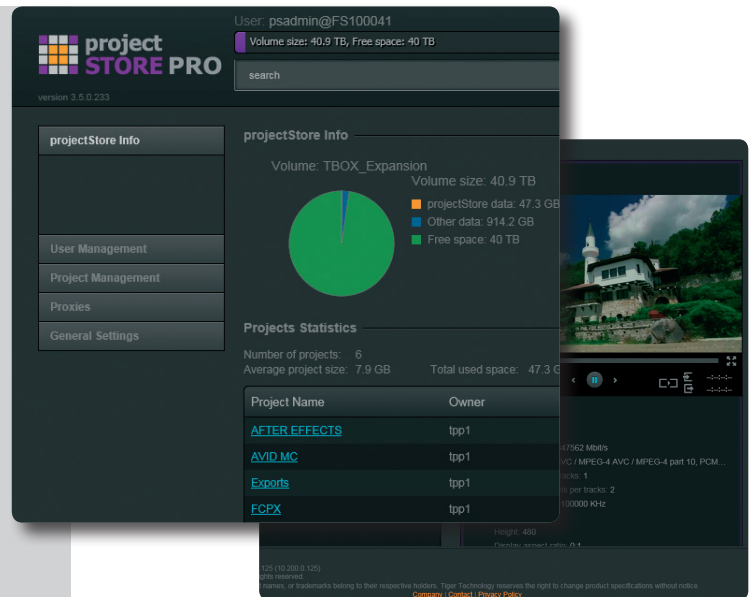

### Complete Project Collaboration

Easily share and manage media and metadata.

With projectStore PRO, your projects:

- Are centrally stored
- Appear as desktop drives
- Are dynamic (can grow and shrink)
- Can be templated

projectStore PRO with Tiger Series solutions allows simultaneous ingest, logging, editing, special F/X, color-grading, graphics, and audio sweetening with no performance degradation.

### Complete User Control

projectStore PRO lets you create and manage users, assign permissions, and monitor project access. Use the simple web UI to create an infinite number of projects, which can be set for single-user write or multi-user write or Avid bin - locking functionality. With single-user write mode the first user gets R/W permissions, and subsequent users get RO. With multi-user write, all users get R/W permissions. The projectStore PRO Unlimited option supports Active Directory for easy integration into your domain.

### Affordable Avid Workflow

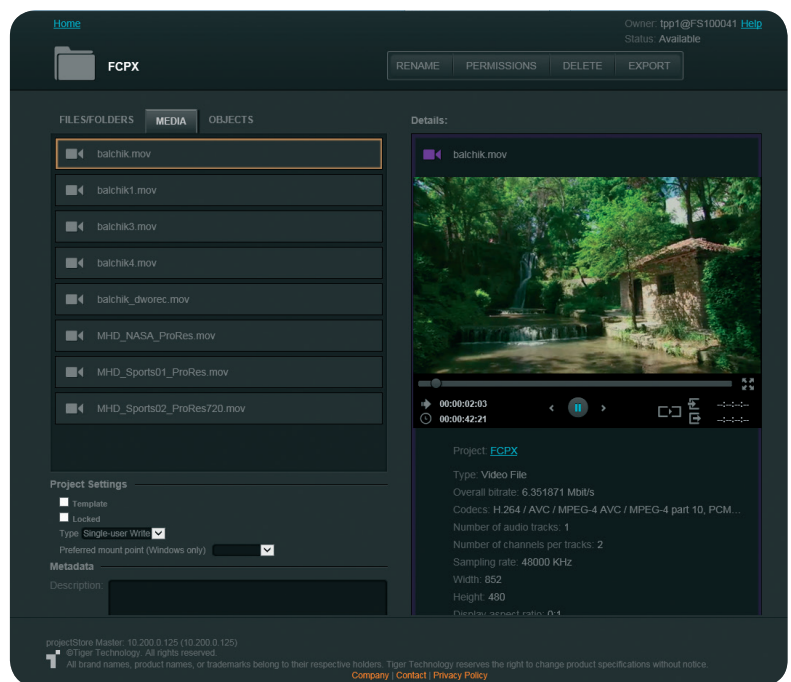

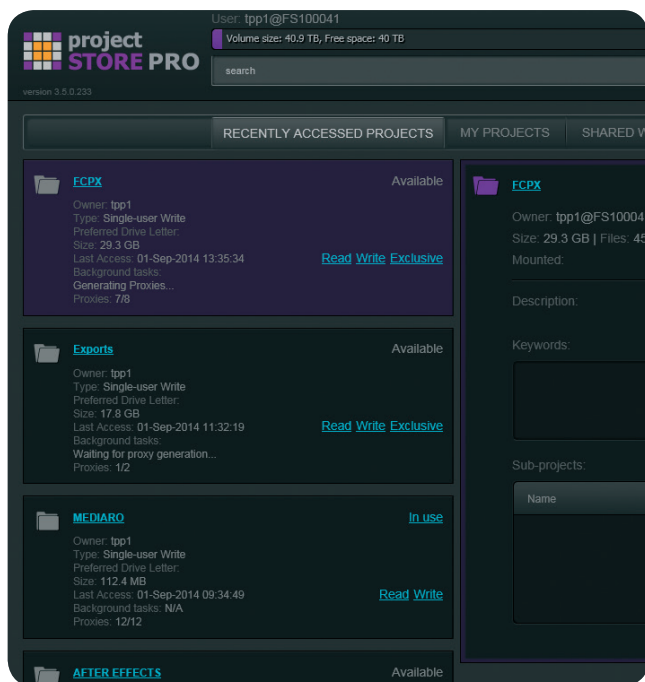

projectStore PRO offers full Avid file system emulation including bin-locking, giving you Unity/ISIS level support in an affordable system so you don't have to compromise your workflow. You get full Avid functionality plus all projectStore PRO's additional features so you can do more, for less.

Storage Workflows Simplified

## Easy, flexible licensing

projectStore PRO is driven by the Intelligent Storage Workflow Engine running on Tiger Shared Storage as a central process and so does not require any installation on client machines. It is available in convenient and sensibly priced floating license packs so you can easily manage staff and freelancers. Users gain enormous management flexibility as they can open multiple projectStore PRO instances simultaneously using a simple web UI.

## projectStore PRO features:

- Facilitates complex workflow and project management
- Project Sharing - Avid bin locking, Adobe CC, Final Cut Pro/X, ProTools, etc.
- Workspace as a locally mounted drive
- User/Team Management - Control who in the team can access projects and media
- Avid-style protected workspaces
- Check-in/check-out - enables sharing while preventing accidental overwrites
- Support for Active Directory Users and Groups (optional Ultimate license pack required)
- Public/Private Workspaces - collaborate with others or work privately
- Completely dynamic workspaces - no formatting, resizing, or pre-allocation required
- Proxy Generation - Review any video clip or image sequence over the internet
- Instant Search - Locate media and projects based on their metadata
- Template Creation - Create new projects from scratch or using templates

All features and specifications subject to change without notice. Some features may require additional licensing.
